

Gynatrix pulchella

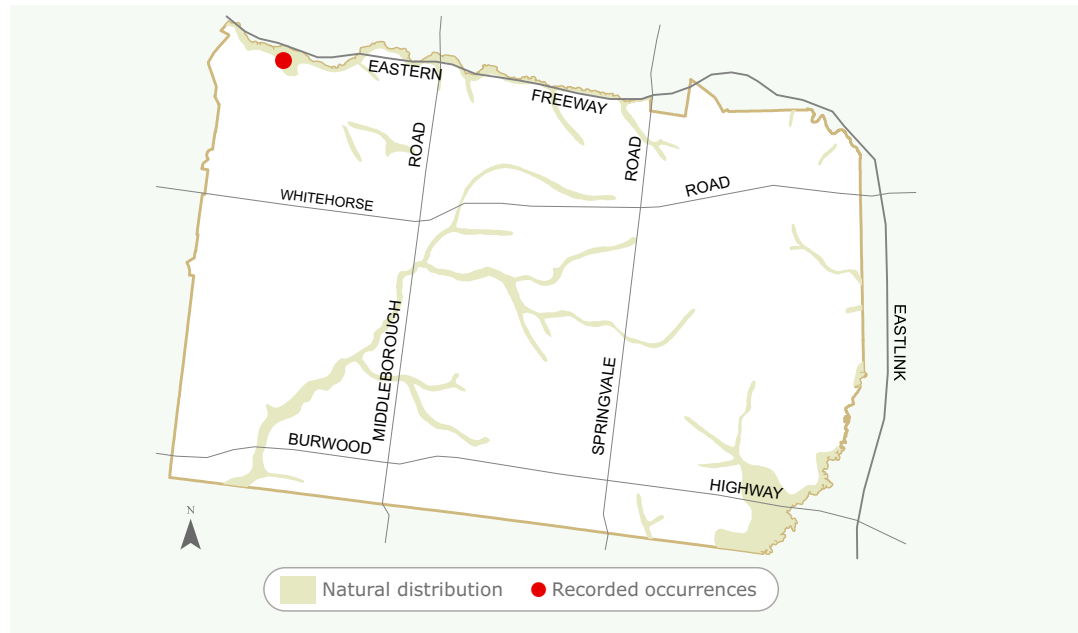

Hemp Bush

Height:	2m - 4m
Width:	1.5m - 3m
Habit:	A fast-growing open woody upright shrub
Foliage:	Heart-shaped hairy leaves to 10cm long with rounded teeth along the edges.
Flowers:	Numerous small fragrant greenish-white flowers. Male and female flowers grow on different plants, female plants have shorter petals. Flowers from August to October.
Requirements:	Moist, well drained soils. Partial sun.
Cultivation & uses:	Often flowers profusely and is very showy in flower. Regular pruning will avoid plant becoming straggly. Good for revegetation along water courses.

Local Distribution:

Map is indicative to the natural distribution of the species based on the best available knowledge.

The natural occurrence of this species is rare.
